-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

This is the first office action for U.S. Application 10/532,449 for a Paint Brush Holder Consisting of One Part filed on April 22, 2005.

#### ***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 4 and 13. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicant claims a paint-brush receiving section with two parallel arms, a container engaging section including first and second parts, as well as two container rim engaging parts and a lever section, a transverse limb, and the paint brush holder being made of a spring material. However, Applicant makes no mention of any of these elements in the specification leaving one to guess what portions of the drawings correspond with Applicant's claims. The specification only describes various points identified by reference characters on the holder. Interpreting the claim to the best extent possible in lieu of the drawings, it appears that Applicant is claiming "the first part (10, 11, and 12) together with a transverse limb (9 or 13, or is 13 part of the second part?) of the paint brush holder, defining a rectangular shaped section...". However, the transverse limb is not disclosed in the specification. Also, the assumed first part (10, 11, 12) does not form a rectangle with either parts 9 or 13 because none of the sides are equal. The second part (14) appears to be in a different vertical plane, which means that either 12 or 13 extend toward part 14 away from 11. The novelty of Applicant's invention appears to be the shape of the holder, as biased wire holders are well known in the art. However, due to the unclear language in the claims defining the shape of the holder, the claims cannot be examined on their merits.
